Assessment Requirements for RIIRIS402E Carry out the risk management process

Release: 1

Assessment Requirements for RIIRIS402E Carry out the risk management process

Modification History

This unit replaces RIIRIS402D Carry out the risk management process. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of carrying out the risk management process that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions. This includes:

- facilitating risk assessment exercises for others
- providing instruction and supervision to those involved in carrying out the risk management process
- identifying hazards
- applying hazard analysis to identify risk
- selecting and implementing the appropriate hazard and risk treatments using the hierarchy of controls to reduce unacceptable risk
- seeking advice and clarifying findings for unacceptable risks
- communicating relevant outcomes, work procedures and requirements for managing risk to all involved parties
- auditing outcomes and processes for compliance and effectiveness, and recommending changes to improve effectiveness
- preparing written risk assessment documentation and reports.

In the course of the above work, the candidate must also:

- locate and apply relevant workplace documentation, policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- commonwealth and state or territory Acts, regulations, codes or practice standards, guidance material and other relevant publications
- internal and external sources of work related health and safety information and data and how to access them
- work related health and safety legislative requirements relating to:

- communication, consultation and participation
- recordkeeping
- specific hazard identification and risk assessment and control methods
- concept of hazards, risks, risk factors, and adequacy/acceptability of risks
- topics or subject areas which are targets for assessment and treatment
- site risk management systems and their application
- site work related health and safety management systems and their application
- Hierarchy of Risk Control measures and its application
- conventions and requirements for written communications including report writing
- problem solving techniques relevant to risk management processes.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to risk management policies, processes, procedures and systems
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces

- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.
