RIIVEH306E Operate a mine service vehicle

Release: 2

RIIVEH306E Operate a mine service vehicle

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.
Release 2	This version first released with RII Resources and Infrastructure Industry Training Package Version 8.0. Minor update of unit of competency. Amendments made to wording of performance criteria to better reflect intent.

Application

This unit describes the skills and knowledge required to operate mine service vehicle in the resources and infrastructure industries.

It applies to those working in supervisory and technical specialist roles. They generally work under minimal supervision to undertake a broad range of skilled applications in varied work contexts, using some discretion and judgement in selecting equipment, services or contingency measures.

Licensing, legislative and certification requirements may apply to this unit and can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for mine services vehicle operations	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to conduct mine service vehicle operations 1.3 Receive, read, interpret and clarify work requirements 1.4 Select appropriate type and capacity of equipment and/or attachments 1.5 Identify and address potential risks, hazards and environmental issues, and implement control measures according to workplace procedures 1.6 Select and wear personal protective equipment appropriate for work

ELEMENT	PERFORMANCE CRITERIA
	activities 1.7 Conduct equipment prestart checks, ensure equipment is ready for operation 1.8 Communicate with other personnel using approved communication methods 1.9 Obtain and interpret emergency procedures, and be prepared for emergency situations
2. Conduct mine service vehicle activities	2.1 Carry out start-up, park and shutdown procedures according to workplace procedures 2.2 Operate equipment within recommended speed, engine capability and limitations according to manufacturer specifications 2.3 Monitor equipment performance utilising appropriate indicators/gauges, maintain operating efficiency according to manufacturer specifications 2.4 Manoeuvre equipment, maximise efficiency and ensure safety of other equipment and personnel
3. Carry out operator maintenance	3.1 Conduct visual inspection and fault finding according to workplace procedures 3.2 Conduct routine operational servicing according to manufacturer specifications to ensure peak performance of equipment
4. Conduct housekeeping activities	4.1 Carry out routine operational maintenance, servicing, lubrication and housekeeping tasks according to workplace procedures 4.2 Clean and store attachments and other ancillary equipment according to workplace procedures 4.3 Process written maintenance records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	Identifies and interprets information from workplace procedures, documentation and regulations
Self-management	Monitors and minimises own exposure to worksite risks and hazards during activities
Oral communication	Uses a range of communication techniques and systems to communicate with others

Unit Mapping Information

Supersedes and is equivalent to RIIVEH306D Operate mine service vehicle.

Assessment Requirements for RIIVEH306E Operate a mine service vehicle

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.
Release 2	This version first released with RII Resources and Infrastructure Industry Training Package Version 8.0. Minor update of unit of competency. Amendments made to wording of performance criteria to better reflect intent.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- operate a mine service vehicle on at least two occasions, including:
 - carrying out prestart, start-up, park-up and shutdown procedures
 - operating, steering, manoeuvring and positioning mine service vehicle, attachments and ancillary equipment
 - carrying out inspections and identify faults
 - conducting operational maintenance including servicing, lubricating and cleaning
 - processing written records and reports.

During the above, the candidate must:

- locate and apply relevant legislation, documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for operating a mine service vehicle
- work effectively with others to operate a mine service vehicle in a way that meets all required outcomes
- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation required to operate a mine service vehicle
- key policies, procedures and documentation required to operate a mine service vehicle, including:
 - equipment relative to working environment
 - recording, reporting and handover procedures
 - start up and shutdown procedures
 - technical information, including manufacturer manuals related to a mine service vehicle
 - operating vehicles within specifications and limitations
 - faults in vehicles and ancillary equipment
 - isolation procedures
 - towing procedures
- principles and techniques for identifying relevant hazards and emergencies
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to operate a mine service vehicle
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.
