Assessment Requirements for RIIWHS404D Implement and monitor health and hygiene management systems

Release: 4

Assessment Requirements for RIIWHS404D Implement and monitor health and hygiene management systems

Modification History

Release	Comment
1	The unit replaces RIIOHS404A Implement and monitor health and hygiene management systems.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant legislation, documentation, policies and procedures
- demonstrates completion of the implementation and monitoring of health and hygiene management systems that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - identifying, communicating, and clarifying job roles and responsibilities to others
 - monitoring of activity for those involved in applying health and hygiene management systems
 - consistently and successfully implements and monitors health and hygiene management systems
 - accesses, interprets and applies technical information
 - using a range of communication techniques to share ideas and information
 - planning and organising activities that maintain or improve health and hygiene systems
 - preparing and documenting systems and procedures for health and hygiene systems
 - apply risk management processes and techniques
 - conducting enquiries / investigations and prepare written reports

- accessing, evaluating and applying data from monitoring systems and equipment / plant
- validating training analysis results
- applying review and audit processes and techniques

Knowledge Evidence

The candidate must demonstrate knowledge of implementing and monitoring health and hygiene management systems through:

- relevant legislative and Industry health and hygiene standards and compliance requirements
- control measure for health and hygiene
- establishing health and hygiene objectives and criteria
- health and hygiene management systems information procedures
- risk management and control theory and processes
- causes, symptoms and impacts of stress on employees
- potential impacts of drug and substance abuse
- chemical information management systems (SDS or equivalent)
- health hazards and controls associated with mining processes and the likely impacts on personnel
- health hazards and controls associated with exposure to heat / cold conditions
- health hazards associated with:
 - explosives
 - radiation and radiation sources
 - equipment and plant
 - lighting
 - vibration
 - noise
- health and hygiene training requirements and systems

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,

- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
