

RII40412 Certificate IV in Underground Coal Operations

Release 2

RII40412 Certificate IV in Underground Coal Operations

Modification History

Not applicable.

Description

This qualification reflects the role of employees such as mine supervisor, team leader or deputy, in an underground coal mine who perform tasks involving a broad range of varied activities most of which are complex and non-routine. They are responsible for the quantity and quality of the output of others, contribute to the development of technical solutions to non-routine problems and apply safety management plans to the workplace.

Pathways Information

Not applicable.

Licensing/Regulatory Information

Not applicable.

Entry Requirements

Employability Skills Summary

The following table includes a summary of the employability skills as identified by the resources and infrastructure industry for this qualification. The table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes required here are broad industry requirements that may vary depending on packaging options.

Employability Skill Industry/enterprise requirements for this qualification include	
Communication	 provide clear and direct feedback listen carefully to instructions and information read and interpret project plans and safety signs calculate basic weights, distances and volumes complete accurate work plans, technical reports, risk assessments, etc negotiate solutions to customer and workplace based issues negotiate project details with clients network with other professionals working in the same field adjust communication style to meet the needs of people with diverse backgrounds
Teamwork	 plan and lead team performance and operations coordinate project activities and timelines with clients work cooperatively with people of different ages, gender, race, religion or political persuasion and people with disability recognise and respond sensitively to people from culturally and linguistically diverse backgrounds provide feedback and advice to staff participate in site-wide planning and coordination activities
Problem-solving	 re-allocate staff and resources in response to changing weather, site conditions and priorities work with staff to solve problems and coordinate team members' responsibilities and activities work cooperatively with clients to resolve contract and operational issues participate in ongoing review and adjustment of operations against performance indicators and project milestones
Initiative and enterprise	 act independently to identify potential improvements to working practice and conditions identify and take steps to resolve risks in the workplace encourage the exploration and application of innovative approaches to improve on operational performance
Planning and organising	 manage and coordinate time and priorities for self and team identify and obtain appropriate personnel and resources for work

Approved Page 3 of 7

	 ensure that risks are assessed and appropriate emergency plans are in place ensure that project planning incorporates the possibility of adapting to future changes
Self-management	 take responsibility for ensuring team targets and goals are achieved understand the standard of work expected at the work site proactively manage team performance develop trust and confidence in staff and customers
Learning	 be willing to learn new ways of working seek information to improve performance from people and workplace documents like policies, procedures etc understand equipment characteristics, technical capabilities, limitations and procedures participate in and, where appropriate, lead change processes work with staff to create learning and development plans prepare and lead formal or informal training sessions
Technology	 apply a range of basic IT skills in monitoring and reporting on systems operate equipment safely and according to manufacturer and workplace guidelines use communications technology appropriate to the workplace (email, mobile, radio, etc) use computer technology to monitor and communicate project status use IT to create documents and maintain records of work activities

Approved Page 4 of 7

Packaging Rules

Requirements for completion of the qualification

The following table provides the packaging rules for this qualification, followed by the list of relevant units of competency.

Successful completion of thirteen (13) units of competency made up of:

- ten (10) core units, and
- three (3) elective units of which:
- at least one (1) must come from the Group A electives listed below
- up to two (2) from the Group B electives listed below
- up to one (1) unit may come from AQF level III, IV or Diploma in this, or any other Training Package.

Units of competency chosen must be relevant to the competency requirements for the job function.

Care must be taken to ensure that all prerequisites specified within imported units, or units chosen as electives, are complied with.

Core units of competency	
Unit code	Unit title
RIIBLA202B	Support underground shotfiring operations
	OR
