RIIMEX204A Conduct workboat/barge operations

Release: 1

RIIMEX204A Conduct workboat/barge operations

Modification History

Not applicable.

Unit Descriptor

This unit covers conducting workboat/barge operations in resources and infrastructure industries. It includes: planning and preparation for operations; operating the workboat or barge; carrying out post-operational procedures.

Application of the Unit

This unit is appropriate for those working in operational and maintenance roles, at worksites within:

- Civil construction
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for operations	1.1. Access, interpret and apply compliance documentation relevant to conducting workboat or barge operations 1.2. Access, interpret and clarify survey data required to complete the allocated work. 1.3. Obtain, interpret and clarify work requirements for the satisfactory completion of operations. 1.4. Inspect and prepare work area in coordination with others to work requirements
2. Operate workboat/barge	2.1. Resolve coordination requirements with others at the site prior to commencing and during work activities 2.2. Carry out pre-start, start-up, mooring and shutdown procedures 2.3. Relocate, position and secure workboat/barge for operation 2.4. Select and modify the operating technique to appropriately meet changing work conditions 2.5. Conduct, control and monitor operations within the equipment limitations 2.6. Act on or report monitoring systems and alarms 2.7. Recognise and respond to hazardous and emergency situations 2.8. Complete work in accordance with the agreed plan and outcomes and within the operating capacity of the allocated equipment
3. Carry out post-operational procedures	3.1. Inspect, fault find and report faults 3.2. Carry out operational maintenance, servicing, lubricating and housekeeping tasks 3.3. Process records and reports

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct workboat/barge operations:

- apply legislative, organisation and site requirements and procedures
- apply operational safety requirements
- access, interpret and apply technical information
- apply equipment records maintenance requirements
- apply diagnostic techniques
- use relevant hand tools
- apply procedures for the disposal of environmentally sensitive fluids and materials
- apply chemical and fuel safety measures
- work wearing personal protective equipment

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct workboat/barge operations:

- site hazard identification and response procedures
- site risk control procedures
- site and equipment health and safety procedures
- site environmental requirements and constraints
- site quality requirements
- site communication procedures
- site survey data
- site operational procedures
- workboat/barge pre-start, start-up, operating, mooring and shutdown procedures and techniques
- workboat/barge characteristics, technical capability and limitations
- site record keeping requirements
- site personal protective equipment requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following: • knowledge of the requirements, procedures and instructions for conducting workboat and barge operations • implementation of requirements, procedures and techniques for the safe, effective and efficient conducting of workboat or barge operations • working with others to undertake and complete workboat or barge operations that meet all of the required outcomes • consistent timely completion of workboat or barge operations that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second

	language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods: • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: • working with others to undertake and complete workboat or barge operations
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant compliance documentation may include:	• legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • codes of practice • Employment and Workplace Relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
Workboat and barges can be:	• in-board or out-board motor powered • diesel or petrol powered
Survey data may include relevant site-specific information in relation to:	• water depths • location of underwater obstacles
Work requirements may come from briefings, handovers, and work orders and may include:	• nature and scope of tasks • achievement targets • operational conditions • obtaining permits required • site layout and out of bounds areas • worksite inspection requirements • lighting conditions • plant or equipment defects • hazards and potential hazards • coordination requirements or issues
Inspect and prepare work area may include:	• identification of hazards • selection and implementation of control measures for the hazards identified • safeguarding site and non-site personnel by: • erection of barricades and posting of signs • selection of appropriate equipment to ensure personnel safety and protection • determination of appropriate path of movement of the workboat/barge • select and apply appropriate workboat/barge

	securing system access ramp preparation and maintenance specified requirements
Coordination with others may include with:	- other workboat/barge personnel - other vessel operators - fuel truck operators - mobile plant operators - processing plant operators - maintenance personnel
Pre-start and start-up procedures include:	- internal and external check of the workboat/barge - check and top up fluid levels (including fuel) - lubrication - inspection of attachments to ensure security and no defects - instrument and control lever checks - reporting defects and damage
Mooring and shutdown procedures include ensuring that:	- workboat/barge is secured as required by site procedures - attachments are rendered safe
Operating techniques may include:	- operating winches - loading and transferring fuel - observing site speed limits - working safely around: - overhead powerlines - other vessels and personnel
Changing work conditions may include variations in:	- changes in river or pond water level - weather conditions - day and night
Hazardous and emergency situations may include:	- powerlines - overhead services - broken anchor or mooring lines - collisions with other vessels - major leaks - flooding - storms and lightning - underwater obstacles - fuel spillages
