RIIPRO301C Conduct crushing and screening plant operations

Release: 1

RIIPRO301C Conduct crushing and screening plant operations

Modification History

Not applicable.

Unit Descriptor

This unit covers the conduct of crushing and screening plant operations in the mining and extractive industries. It includes: planning and preparation for operations, operating the plant, and carrying out post-operational procedures.

Application of the Unit

This unit is appropriate for those working in processing plant operator roles, at worksites within:

- Coal mining
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for operations	1.1. Access, interpret and apply <i>compliance documentation</i> relevant to the conduct of crushing and screening plant operations 1.2. Obtain, interpret and clarify <i>work requirements</i> for the satisfactory completion of operations 1.3. Select and use <i>personal protective equipment</i> appropriate for work activities 1.4. Ensure area is well ventilated before entry 1.5. <i>Inspect and prepare work area and equipment in coordination with others</i> 1.6. Prepare a work plan according to site procedures 1.7. Select appropriate type of auxiliary equipment for work activities 1.8. Resolve coordination requirements with others at the site prior to commencing and during work activities
2. Operate the crushing and screening plant	2.1. Carry out <i>pre-start, start-up, run and shutdown procedures</i> 2.2. Select and modify the <i>operating technique</i> to appropriately meet <i>changing work conditions</i> 2.3. Use dust suppression and extraction methods 2.4. Conduct, control and monitor operations within the equipment limitations, maintaining crushing and screening efficiency and effectiveness 2.5. Act on or report performance monitoring systems and alarms 2.6. Recognise and respond to <i>hazardous and emergency situations</i> 2.7. Complete work in accordance with the agreed plan and outcomes and within the operating capacity of the allocated equipment
3. Carry out post-operational procedures	3.1. Inspect, fault-find and report faults 3.2. Carry out <i>operational maintenance, servicing, lubricating and housekeeping</i>

	<i>tasks</i> 3.3. Maintain, process and pass on records and reports
--	---

Required Skills and Knowledge

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct crushing and screening plant operations:

- apply legislative, organisation and site requirements and procedures
- apply operational safety requirements
- access, interpret and apply technical information
- apply plant operating procedures
- apply production and equipment records maintenance requirements
- apply diagnostic techniques
- use relevant hand and power tools
- apply procedures for the disposal of environmentally sensitive fluids and materials
- apply chemical and hydrocarbon safety measures
- work wearing personal protective equipment
- apply particle size assessment techniques
- apply operation, maintenance and cleaning techniques
- apply hazard identification and management procedures
- apply hazardous materials handling procedures
- apply defect identification techniques and reporting requirements
- interpret reports
- apply lifting techniques (manual, cranes and loads)
- apply operations monitoring procedures
- applying safe work practices
- apply procedures for working at heights

Required knowledge

Specific knowledge is required to achieve the performance criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following as required to conduct crushing and screening plant operations:

- site hazard identification and response procedures
- site risk control procedures
- site and equipment health and safety procedures
- site environmental requirements and constraints
- site quality requirements
- site communication procedures
- site product characteristics
- site layout and plans
- site operational procedures
- plant pre-start, start-up, operating and shutdown procedures and techniques

- plant components functions, characteristics, technical capability and limitations
- plant breakdown procedures
- plant isolation procedures
- site record keeping requirements
- site confine space work procedures
- site personal protective equipment requirements
- contaminant identification

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following: • knowledge of the requirements, procedures and instructions for conducting crushing and screening plant operations • implementation of requirements, procedures and techniques for the safe, effective and efficient conducting of crushing and screening plant operations • working with others to undertake and complete crushing and screening plant operations that meets all of the required outcomes • consistent timely completion of crushing and screening plant operations that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills,

	task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods: • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: • working with others to undertake and complete the crushing and screening plant operations

Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant compliance documentation may include:	• legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • code of practice • Employment and Workplace Relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
Work requirements may come from briefings, handovers, and work orders and may include:	• product details • nature and scope of tasks • achievement targets • operational conditions • plant configuration • site layout and out of bounds areas • stockpile details • worksite inspection requirements • lighting conditions • plant or equipment defects • hazards and potential hazards • coordination requirements or issues
Personal protective equipment may include:	• chemical/gas detectors • eye protection (e.g. glasses) • hearing protection (e.g. ear plugs) • protection from the elements (e.g. sun block) • protective clothing (e.g. gloves, safety boots, helmet, shin guards, long sleeved shirt and trousers) • respiratory devices • safety harness when working at heights
Inspect and prepare work area and equipment may include:	• stockpile areas/product bins • identification of hazards • selection and implementation of control measures for the hazards identified • safeguarding site and non-site personnel by:

	- erection of barricades and posting of signs - selection of appropriate equipment to ensure personnel safety and protection - stabilising plant - positioning plant
Coordination with others may include with:	- yard persons - laboratory personnel - mobile plant operators - maintenance personnel
Pre-start and start-up procedures may include:	- walk around check of the plant - checking and toping up fluid levels (including fuel) - lubrication/greasing - inspection of attachments to ensure security and identify defects - instrument and control lever checks, and - reporting defects and damage - follow prescribed start-up sequence - confirm plant is operational
Shutdown procedures may include:	- following prescribed shutdown sequence - securing equipment - emergency
Operating techniques may include:	- feed control adjustments - crusher adjustment - working safely around other machines and personnel
Changing work conditions may include variations in:	- rock types - feed grading and contamination - weather conditions - day and night
Hazardous and emergency situations may include:	- confined spaces - working alone - personal injury, e.g. - crush injuries - burns - slips - trips - falls - chemical exposure - fatigue - plant, e.g.

	• structural damage • emergency shutdown • unplanned shutdown • environmental e.g. • seepage • emissions • chemical spills • pollution • anything detrimental to fauna and flora • fire • dust • noise • electrical
Operator service, maintenance and housekeeping tasks are those established and authorised for the site and may include:	• scheduled servicing • changing wear components • greasing • equipment adjustments • cleaning
