SFIAQU401 Develop and implement a stock health program

Release: 1

SFIAQU401 Develop and implement a stock health program

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to review, develop and implement a program and work procedures for maintaining the health of stock.

The unit applies to individuals who have planning responsibilities for an aquaculture stock health program and who supervise the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Aquaculture (AQU)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Gather information for a stock health program	1.1 Interpret and review stock health management plan and stock production, and confirm objectives with senior personnel 1.2 Identify locally prevalent health problems and note potential exotic pests, predators and diseases, especially those with significant economic impact 1.3 Investigate current industry husbandry practices that prevent and control health problems
2. Develop health	2.1 Select control measures that aim to prevent the introduction of
