Assessment Requirements for SFICPL202

Conduct field observations

Release: 1

Assessment Requirements for SFICPL202 Conduct field observations

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted at least one field observation on at least one occasion, including:

- interpreting and confirming work requirements and other task-related information
- identifying hazards and risk controls in relation to field observations
- selecting, checking and using equipment, including personal protective equipment appropriate for the purpose of the observation
- identifying, recording and reporting on evidence of non-compliance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- range and operational requirements of observation and recording equipment
- culturally sensitive areas impacting on the field observation:
 - sacred and other culturally significant sites
 - cultural activity, including the attitude, beliefs and values of local communities
- environmental and community issues relating to natural resource management, including:
 - customary fishing
 - existence of any native title
- marine and fisheries management and surveillance legislation and regulations relevant to the field observation
- recording and reporting requirements for field observations
- safety procedures and hazards associated with field observations
- nature and types of evidence of non-compliance identified from field observations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a field observation setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - recording forms
 - observation and recording equipment
 - personal protective equipment
- specifications:
 - directives and details explaining the observation task
 - access to relevant legislation and regulations related to surveillance
 - workplace policies and procedures, including safety and operating procedures
 - relevant sources of information
- relationships:
 - evidence of interactions with supervisor and team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
