| Release 1 | This version released with SFI Seafood Industry Training Package Version 1.0. |

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has monitored and maintained the operational safety of the workplace on at least one occasion, including:

- recognising and accurately assessing situational risks and hazards
- recording, reporting and advising others of safety incidents and issues or faults with personal defence equipment
- planning, implementing and adapting workplace safety responses to the situation
- employing appropriate tactical communications and defensive tactics as required by the situation
- using operationally appropriate deployment of personal defence equipment.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- established strategies to optimise safety under a range of operational scenarios
- general duty of care responsibilities in maintaining operational safety
- logs or damage reports required and when they must be completed
- health and safety guidelines for lifting and carrying persons
- relevant state or territory organisational work health and safety legislation as it applies to policing
- organisational policy and procedures covering operational safety issues and practices
- potential risks associated with a full range of non-specialist operational activities
- use of tactical communications, including conflict resolution, mediation and incident de-escalation techniques
- the 'use of force', and its legal parameters and reporting requirements in relation to operations

- considerations for communicating with the general community, including those with special needs and those with cultural differences.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a fisheries monitoring compliance setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective equipment
  - personal defence equipment
  - reporting documentation
- specifications:
  - access to relevant state or territory work health and safety legislation
  - workplace procedures covering operational safety issues and practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
