Assessment Requirements for SFICPL308 Monitor fish catches for legal compliance

Release: 1

Assessment Requirements for SFICPL308 Monitor fish catches for legal compliance

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted compliance monitoring activities for fish catches and devices on at least one occasion, including:

- monitoring size, weight and catch limits relevant to the fish species
- monitoring the fishery records and documents
- identifying variations and discrepancies in weights and quantities
- following safety and hygiene and sanitation practices during monitoring activities
- preparing accurate records and reports on compliance monitoring activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- fishing methods and technologies used by fishers in the local region
- regulations relating to fish catches, nets and other fish catching devices, fishing methods and other related equipment
- legislation and regulations relating to the commercial and recreational fishing industry and existing land rights, including biosecurity, translocation and quarantine
- regulations and industry standards applying to fish processors and fisheries quotas
- jurisdictional and organisation procedures for recording and reporting compliance monitoring activities
- industry hygiene and sanitation practices relevant to compliance monitoring activities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a fish and fisheries compliance monitoring setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fish species likely to be monitored for compliance
 - measuring devices
 - nets and fish catching devices and other equipment related to fish catching likely to be monitored for compliance
- specifications:
 - access to legislation and regulations relevant to traditional, commercial and recreational fishing and compliance monitoring activities
 - workplace procedures for monitoring fish catches, including advice on industry hygiene and sanitation practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
