Assessment Requirements for SFIFSH203 Use trawls to land catch

Release: 1

Assessment Requirements for SFIFSH203 Use trawls to land catch

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has undertaken trawl fishing operations on at least one occasion, including:

- maintaining and preparing demersal or mid-water fish or prawn trawling gear ready for deployment
- safely deploying and using winches to retrieve trawl gear components
- stowing trawl safely in readiness for future deployment
- loading and containing the catch as specified by supervisor
- handling and sorting seafood according food safety and quality requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic operating principle of the trawl fishing gear
- factors that make trawl components effective or defective
- order in which trawl gear components are connected and disconnected
- environmental impacts and resource protection relevant to trawl fishing operations
- principles that contribute to vessel stability
- food safety and hygiene requirements for handling and sorting seafood catch
- biosecurity and health and safety requirements for trawl fishing operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a fully operational fish or prawn trawler, or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fishing trawls and related equipment and machinery
 - catch suitable for sorting
- specifications:
 - trawl fishing operations specific instructions
 - workplace procedures for trawl fishing operations that include advice on food safety, health and safety, quality and environmental requirements
- relationships:
 - evidence of interactions with supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
