SFISAD403 Analyse international seafood market opportunities

Release: 1

SFISAD403 Analyse international seafood market opportunities

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge to analyse international markets for seafood products. It includes the ability to conduct a supply chain analysis, research existing and potential new market opportunities, interpret international data and product specifications, and record and present findings.

The unit applies to individuals who undertake international market analysis for seafood cooperatives, wholesale or retail outlets in establishing new international seafood buyers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Seafood Industry Sales and Distribution (SAD)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse existing international markets	1.1 Develop standardised criteria for evaluating international markets 1.2 Identify existing international markets for similar seafood products 1.3 Document a supply chain analysis of existing international markets in accordance with workplace procedures
2. Identify new potential international markets	2.1 List potential international markets for seafood products

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	2.2 Source market information from a range of relevant data 2.3 Determine potential product specifications for each market using appropriate product specifications 2.4 Undertake a supply chain analysis for identified potential markets 2.5 Document logistics, regulatory costs and requirements from source and target countries in the required format 2.6 Communicate with buyers to confirm product interest and intent
3. Record, analyse and present relevant data	3.1 Present data gathered from market information and supply chain analysis 3.2 Analyse relevant data against standardised criteria using appropriate technology 3.3 Present markets with the highest potential to key stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	Calculates and estimates market characteristics from numerical data and statistical information
Reading	Accesses sources of market information
Writing	Records and synthesises relevant data into appropriate formats
Interact with others	- Selects and uses appropriate vocabulary, conventions and protocols, including technical language, in interactions with buyers - Adapts communication style and content, including personal, social and cultural factors, to build rapport with buyers
Get the work done	- Plans, monitors and manages relatively complex, routine and non-routine tasks, making adjustments as necessary - Uses computer technologies to analyse market and research data

Assessment Requirements for SFISAD403 Analyse international seafood market opportunities

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted an analysis to identify at least one potential international seafood market opportunity on at least one occasion, including:

- developing a criteria for evaluating international markets
- undertaking a supply chain analysis for existing and new markets
- researching and documenting information on international seafood market opportunities
- presenting information and data on the market with the highest potential.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- international seafood products and specifications
- international seafood supply chains
- international seafood markets
- regulatory costs and requirements of both source and target countries
- cultural norms for communicating with buyers of the target country.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a seafood industry workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - sources of market information and data
 - technology for analysing market and research data.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
