Assessment Requirements for SIFEMWK012 Restore and set eyes after eye donations

Release: 1

Assessment Requirements for SIFEMWK012 Restore and set eyes after eye donations

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to:

- identify restorative requirements through examination and to restore and set eyes using correct techniques and following work health and safety/occupational health and safety and infection control practices
- prepare mortuary area and select and use the required instruments and equipment
- clean, disinfect and sterilise the mortuary area, instruments and equipment at conclusion of the treatment.

Evidence of performance of restoring and setting eyes after eye donation of different cases on two or more occasions is required to demonstrate consistency of performance and ability to respond to different situations.

Knowledge Evidence

Demonstrated knowledge of:

- mortuary instruments and equipment used for restoration of eyes after donation and associated uses
- requirements for preparing the mortuary area
- properties and uses of germicidal sprays and disinfectants
- structure and function of the eyes and head in relation to eye removal and restoration
- eye shaping techniques that may include use of eye caps and positioning of eyelids
- workplace policies and procedures for performing head treatments
- correct and environmentally sound disposal methods for all types of waste and in particular for hazardous substances
- funeral services industry parameters and protocols for dealing with the deceased, including social, cultural and religious requirements considerations
- federal, state or territory, and local government legislation and regulations relating to work health and safety/occupational health and safety, infection control and handling human remains.

Assessment Conditions

Skills must be demonstrated in a mortuary workplace:

- using suitable equipment and resources, including:
 - deceased bodies that have been subject to eye donation
 - mortuary instruments and equipment including personal protective equipment and cleansing and disinfecting products
- under industry operating conditions where there is:
 - integration of tasks with possible interruptions to work typical of the job role
 - speed and timing requirements that reflect commercial operating conditions

As well as satisfying the NVR/AQTF mandatory competency requirements, assessors must also hold formal qualifications as an embalmer.
