SIFMWK010A Restore and set eyes after eye donation

Revision Number: 1

SIFMWK010A Restore and set eyes after eye donation

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance criteria, skills and knowledge required to prepare and restore the eye area after eye donation in preparation for a viewing of the deceased person by the family.

Application of the Unit

Application of the unit

This unit applies to embalming staff and involves working autonomously with a high level of responsibility.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Nil

Employability Skills Information

Employability skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | | |
|---|---------------------------------|---|
| 1 | Conduct preparatory procedures. | 1.1 Identify and prepare mortuary area and appropriate <i>instruments and equipment</i> according to <i>workplace policies and procedures, relevant legislation</i> and <i>infection control practices</i> .
1.2 Prepare and use <i>personal protective equipment</i> according to workplace policies and procedures, and relevant legislation.
1.3 Identify and respect <i>social, cultural and religious requirements</i> .
1.4 Access and analyse photographs of the deceased person to assist with eye restoration work according to workplace policies and procedures. |
| 2 | Unpack and clean eye sockets. | 2.1 Remove packed materials from eye socket and dispose of according to workplace policies and procedures, and relevant legislation.
2.2 Examine eye socket to determine presence of severed vessels.
2.3 Tie off severed vessels according to workplace policies and procedures as required.
2.4 Clean eye socket using cotton wool and appropriate disinfectant according to workplace policies and procedures. |

ELEMENT	PERFORMANCE CRITERIA
3 Restore and set eyes.	3.1 Repack eye sockets using appropriate materials and processes according to workplace policies and procedures. 3.2 Shape eyes into natural position using appropriate eye shaping techniques and referring to photographs of the deceased person as required. 3.3 Close upper eyelid 2/3 down and lower eyelid 1/3 up and apply suturing techniques as required. 3.4 Check correct balance with an aneurysm needle across the bridge of nose. 3.5 Conduct evaluation of restoration work and perform remedial action as required.
4 Clean up instruments, equipment and mortuary area.	4.1 Clean, disinfect or sterilise instruments and equipment according to workplace policies and procedures, and relevant legislation. 4.2 Dispose of waste materials according to workplace policies and procedures, and relevant legislation. 4.3 Store instruments and equipment according to workplace policies and procedures and report faults. 4.4 Clean and disinfect mortuary area according to workplace policies and procedures, and relevant legislation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- planning and organisational skills to identify and prepare required instruments and equipment
- technology skills to identify and apply appropriate equipment use
- self-management skills to monitor own response to dealing with deceased bodies and take corrective action
- problem-solving skills to identify and address hazards and complications.

Required knowledge

- infection control practices and procedures
- workplace policies and procedures for performing eye restoration procedures
- sterilisation procedures for instruments and equipment
- properties and uses of germicidal sprays and disinfectants
- social, cultural and religious requirements
- funeral services industry parameters and protocols for dealing with the deceased
- broad working knowledge of relevant federal, state or territory, and local government legislation and regulations relating to OHS, infection control and handling human remains.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to identify restorative requirements through examination and to restore and set eyes using correct techniques and following OHS and infection control practices

EVIDENCE GUIDE

- ability to prepare mortuary area and select and use the required instruments and equipment
- the cleaning, disinfecting and sterilising of the mortuary area, instruments and equipment at conclusion of the treatment
- knowledge of infection control practices
- restoring and setting eyes after eye donation on multiple occasions to ensure consistency of performance and ability to respond to different situations.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills in a mortuary facility where deceased bodies may be safely prepared and appropriate mortuary lighting, plumbing and ventilation requirements can be monitored and maintained
- access to deceased bodies that have been subject to eye donation
- access to cleansing and disinfecting products
- access to mortuary instruments and equipment
- access to personal protective equipment.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of candidate preparing mortuary area, instruments and equipment and applying eye restoration and cleansing and disinfecting procedures
- written or verbal questioning to assess knowledge and understanding of infection control practices and properties of disinfectant products
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIFMWK007A Set facial features.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- Instruments and equipment*** may include:
- personal protective equipment
 - aspirating instruments
 - sterilisation equipment
 - sterilisation chemicals and solutions
 - instruments and instrument tray
 - dressing table
 - tubing for aspirating or injecting
 - disinfectant hand solution, paper towels and soap
 - plastic laundry bags
 - plastic infectious waste bags
 - biomedical waste containers for infectious and radioactive human tissue
 - pedestal lamps
 - linen
 - first aid kit
 - cotton wool
 - plastic sheeting for wrapping bodies
 - waterproof tape
 - capsules for transporting babies
 - scalpels
 - scissors
 - suture needles
 - needle holder
 - forceps
 - electric or motorised aspirating instruments, including:
 - autopsy aspirator
 - hydroaspirator
 - trocar
 - hydrovalve trocar

RANGE STATEMENT

- cavity fluid injectors
- trocar buttons and applicator.

Workplace policies and procedures may include:

- standard operating policies and procedures
- standards and certification requirements
- communication protocols
- quality assurance procedures
- OHS procedures, including:
 - infection control procedures
 - manual handling procedures
 - material handling procedures, including hazardous or infectious materials
- emergency procedures, including fire and accident procedures
- security procedures.

Relevant legislation, regulations and codes of practice may include:

- OHS
- Anatomy Act
- Human Tissue Act
- Skin Penetration Act
- Coroner's Act
- Public Health Act
- Environment Protection Act
- local government regulations
- funeral services industry code of practice
- Worksafe Australia certification and standards.

RANGE STATEMENT

Infection control practices may include:

- checking for infectious and transmittable disease
- using personal protective equipment
- sterilising apparatus and instruments
- providing sterile storage areas for instruments
- using disinfectants
- safe removal and disposal of soiled and contaminated garments
- safe ventilation
- avoiding invasive procedures on bodies
- immunisation
- periodic X-rays
- seeking medical advice
- recording injury and incidence
- reporting injury and incidence
- providing first aid kit
- performing first aid as necessary
- labelling clothing.

Personal protective equipment may include:

- disposable gloves
- heavy duty gloves
- barrier gown or suit
- waterproof overshoes
- waterproof aprons
- splash proof masks
- eye goggles
- face visor
- hair cover
- filtered air supply:
 - negative air pressure
 - powered positive air supply.

Social, cultural and religious requirements may include:

- dress standards
- gender of embalming personnel
- time required between death and burial or cremation
- orientation of the deceased person
- restrictions on methods of embalming permissible.

RANGE STATEMENT

Eye shaping techniques may include:

- use of eye caps
- positioning of eyelids.

Suturing techniques may include:

- individual
- baseball stitch
- single intradermal
- double intradermal
- inversion
- interlocking
- continuous
- 'N'
- purse string.

Evaluation may include:

- purse string sutures
- other openings not closed
- incisions not sutured
- incision seal powder
- leakage from sutures.
