SISOFSH417A Demonstrate marine offshore fishing skills

Release: 2

SISOFSH417A Demonstrate marine offshore fishing skills

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to catch fish in blue water and marine offshore reef environments. The unit focuses on identifying fish habitats, selecting tackle, equipment and bait, and applying appropriate fishing techniques, including the safe handling, landing and releasing of blue water fish.

Application of the Unit

This unit applies to personnel employed as fishing tour guides, charter boat operators, deck hands, sports fishermen and retail tackle shop employees.

This may include those working for private outdoor adventure companies, volunteer organisations, not for profit organisations, government agencies, or group instructors in outdoor education programs.

Licensing/Regulatory Information

A Recreational Fishing License and maritime permits may apply to this unit, depending on the waters in which the unit is to be assessed. Confirm requirements with the appropriate state department or authority.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.

- | | |
|---|---|
| <p>1. Prepare to fish in a marine offshore environment.</p> | <p>1.1. Identify marine offshore target <i>species</i>, their habitat and seasonal cycle.</p> <p>1.2. Identify potential <i>hazards</i> associated with marine offshore fishing, and procedures to minimise <i>risks</i>.</p> <p>1.3. Access <i>relevant sources</i> to interpret detailed <i>weather and environmental information</i> that may impact on the activity.</p> <p>1.4. Determine the most appropriate <i>fishing technique</i> for the target species.</p> <p>1.5. Select appropriate <i>fishing rig, equipment, terminal tackle, bait or lure and berley</i> for target species and check working order.</p> <p>1.6. Select safety equipment and gear to minimise risk of injury.</p> <p>1.7. Assemble and balance fishing rig to suit target species, habitat and the fishing environment.</p> |
| <p>2. Catch fish offshore.</p> | <p>2.1. Locate appropriate <i>offshore fishing location</i> and determine safety measures according to <i>relevant legislation</i> and <i>organisational policies and procedures</i>.</p> <p>2.2. Deploy fishing rig using appropriate technique to present lure or bait to the target species.</p> <p>2.3. Disperse berley if applicable.</p> <p>2.4. Monitor fishing rigs performance and change settings as required to optimise outcomes.</p> <p>2.5. Retrieve rig and land fish in appropriate manner according to relevant legislation and organisational policies and procedures.</p> |
| <p>3. Handle offshore fish.</p> | <p>3.1. <i>Handle and release fish</i> in a humane manner according to relevant legislation and organisational policies and procedures.</p> <p>3.2. Release fish using appropriate tagging, handling and</p> |

ELEMENT	PERFORMANCE CRITERIA
	return techniques.
	3.3.Despatch retained fish in a humane manner according to relevant legislation and organisational policies and procedures.
4. Finalise fishing operations	4.1.Analyse performance of the fly and fishing rig. 4.2.Identify improvements or modifications for future fly fishing sessions. 4.3.Clean, maintain and safely stow fishing rig and equipment according to organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- problem-solving skills to:
 - respond appropriately to changing conditions
 - decide on marine offshore fishing equipment and materials to use
 - determine techniques to use when fishing in various conditions
- planning and organising skills to:
 - source marine offshore fishing equipment, materials, bait and berley
 - ensure all gear and equipment is in good working order
 - determine target fish, fishing rig and techniques to use to catch fish
- literacy skills to analyse, interpret and apply weather and environmental information, maps, charts, tidal information, GPS, fish finding equipment, relevant legislation and organisational policies and procedures
- self management skills to:
 - review and reflect on own performance
 - set goals to improve marine offshore fishing techniques
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- legislation and organisational policies and procedures to enable safe and legal conduct of all activities performed in marine offshore environments
- fish species preferred habitats and food or feeding styles
- fishing locations and best times to target fish species including tidal pattern, evening, dawn, season, migratory pattern, lunar cycle, breeding cycle
- marine offshore fishing equipment, its characteristics and technology, and advantages and disadvantages of the range of equipment
- safety equipment and gear to minimise risk of injury
- lures suitable for target species, fishing rig and deployment method
- lure deployment methods and techniques which present the bait to the target species in the most advantageous manner
- fishing rigging techniques suitable for offshore and fishing rig setting adjustments to optimise performance
- maritime communication equipment and its use to enable safe off shore operations
- deep and or surface water species, reef species, and cold and or warm water species to locate during marine offshore fishing
- selection, preparation and deployment of berley to maximise attraction of target species
- fishing rod designs and features suitable for marine offshore applications and the target species

- hand reels suitable for marine offshore fishing and the target species
- safe and appropriate rig and catch retrieval techniques which minimise stress to the fish and damage to the rig
- landing and de-hooking techniques appropriate to the species of fish
- techniques for handling fish and returning undersized and unwanted fish to the water without damage
- techniques to humanely dispatch fish quickly and decisively
- dangerous fish species and their defining features and methods of handling them
- weather and environmental information to ascertain possible conditions and their affect on the activity.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies safety measures to conduct marine offshore fishing activities and selects safety equipment and gear to minimise the risk of injury
- applies a range of fishing techniques and various processes to catch and handle fish in marine offshore environments using various baits and lures
- evaluates and reflects on own performance to identify strengths and weaknesses and areas that need improvement.

Context of and specific resources for assessment

Assessment must ensure participation in multiple marine offshore fishing activities in locations that reflect local conditions to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- appropriate marine offshore fishing environments
- marine offshore fishing equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of safe participation and demonstration of all practical tasks during marine offshore fishing
- oral or written questioning to assess knowledge of marine offshore fishing techniques
- observation of safe and humane catching and handling of fish
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Species may include:

- Blue Water Species
- Reef species.

Hazards may include:

- temperature extremes
- slippery or unstable terrain
- dangerous animals and insects
- stinging trees and nettles
- dense vegetation
- group management hazards
- slippery or unstable shore
- poor posture, poor technique
- poor carrying techniques
- loose or insecure craft when being transported.
- other craft
- the fishing location
- tides
- size and species of fish landed
- reliability of navigation equipment.

Risks may include:

- hypothermia
- heat exhaustion
- injuries
- exhaustion
- lost party or party member
- equipment failure
- stings or bites.

Relevant sources may include:

- Bureau of Meteorology
- media
- land managers or agencies
- coastal patrol or coastguard
- volunteer marine rescue
- local knowledge.

Weather and environmental information may include:

- satellite images
- daily and weekly forecasts
- maximum and minimum temperatures
- weather warnings

- event warnings
 - river levels
 - synoptic charts
 - high and low tide predictions.
- Fishing techniques*** may include:
- trolling
 - bottom fishing
 - float
 - jig
 - lure
 - cubing or chunking.
- Fishing rig, equipment, terminal tackle*** may include:
- rods
 - reels and line
 - rigs
 - sinkers
 - lines.
- Bait*** may include:
- fish pieces or fish gut
 - live or dead bait fish
 - chicken meat
 - shell fish
 - prawns
 - squid
 - worms
 - nippers
 - weed.
- Berley*** may include:
- commercial mix
 - fish frames, pieces or scraps
 - prawn heads and shells
 - fish oils
 - bread or bread crumbs
 - worms
 - maggots
 - sand
 - wheat
 - bran
 - chopped weed
 - vegetable mix
 - berley cages, blobs, bombs.
- Offshore fishing location*** may include:
- edge of the continental shelf
 - beyond continental shelf
 - canyons
 - sea mounts and ridges

- reef
 - maritime wreck
 - current lines
 - temperature breaks.
- Relevant legislation*** may include:
- occupational health and safety
 - permits or permission for access
 - environmental regulations:
 - marine regulations
 - fishing regulations and restrictions
 - protected species
 - recreational fishery and netting licenses
 - fish and bag size limits.
- Organisational policies and procedures*** may include:
- occupational health and safety
 - safety and emergency procedures
 - use, maintenance and storage of equipment
 - procedures for handling dangerous fish
 - humane handling of fish policies
 - procedures for returning undersized and unwanted fish to water
 - maritime emergency procedures
 - manufacturer's design specifications and recommendations for equipment use
 - code of ethics
- Handle and release fish*** may include:
- using fish handling tools, crates and rubber landing nets
 - removing hook or cutting the line
 - de hooking with fish still in the water
 - using gentle release practices
 - fizzing a fish
 - releasing weights.
