Assessment Requirements for TLIA0013

Maintain container and freight records

Release: 1

Assessment Requirements for TLIA0013 Maintain container and freight records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating with others
- estimating size, shape and special requirements of loads
- identifying goods by codes and markings, including:
 - dangerous goods
 - emergency information panels
 - international
 - national
- interpreting and following operational instructions, procedures and information
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- container controlled systems
- focus of operation of work systems, equipment, management and site operating systems for maintaining container and freight records
- freight marking and numbering systems
- national and international standards, codes of practice and regulations relevant to maintaining container and freight records, including dangerous goods' codes
- possible risks with maintaining container and freight records and appropriate control measures
- relevant bond, quarantine or other legislative requirements
- relevant handling and safety codes of practice
- relevant statutory authority requirements

- workplace procedures and policies for maintaining container and freight records
- worksite layout and location of all container units.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.
