Assessment Requirements for TLIA0028 Implement safety stock systems

Release: 1

Assessment Requirements for TLIA0028 Implement safety stock systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others in a timely manner
- completing relevant documentation
- determining and reviewing optimum safety stock levels
- identifying safety and resolving stock discrepancies
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- reading, interpreting and following relevant instructions and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- contingency plans
- definitions of commonly used terminology such as lead time, lead time demand, forecast, demand history and order cycle
- principles, purpose and location of controls, monitoring devices and systems
- procedures for identifying problems with the safety stock system in use
- procedures for operating electronic communications equipment
- relevant sections of national and state/territory regulatory requirements and codes of practice
- requirements for completing relevant documentation, including commonly used methods to estimate required safety stock levels
- steps involved in planning work activities
- typical problems that can occur and related actions that should be taken.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.
