TLIA2047 Stream mail

Release: 1

TLIA2047 Stream mail

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to stream mail in readiness for the next stage of processing, in accordance with regulations and workplace requirements.

It includes preparing to stream mail and carrying out the task of streaming mail in accordance with workplace procedures, and finalising all required streaming operations.

Work is normally performed under general supervision, usually within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---------------------------------|--|
| 1 Prepare to stream mail | 1.1 Individual and work team priorities and responsibilities are identified and confirmed |
| | 1.2 All work health safety (WHS)/occupational health and safety (OHS) and workplace environment protection procedures and requirements are identified, accessed and applied |

- 1.3 Mail to be streamed is identified, accessed and prepared
- 2 Stream mail**
 - 2.1 Internal operating procedures and standards are applied to streaming mail
 - 2.2 Mail is categorised and streamed accurately and correctly in accordance with priority for streaming
 - 2.3 Mail is handled safely to minimise risk of injury to people and damage to mail
- 3 Complete mail streaming**
 - 3.1 Mail containers are loaded onto appropriate mail movement device and labelled
 - 3.2 Information required to complete records of mail processed is provided and recorded, and record are processed in accordance with workplace procedures
 - 3.3 Mail containers are transferred to next processing point using appropriate shifting equipment
 - 3.4 Excess equipment is removed and work area is prepared for next activity shift

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2047A Stream mail.

Assessment Requirements for TLIA2047 Stream mail

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- applying safety and security precautions and required action to minimise, control or eliminate identified hazards
- communicating effectively with others
- completing relevant documentation
- identifying, selecting and using relevant equipment, processes and procedures
- interpreting and applying relevant agreements, codes of practice or other legislative requirements
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures and labels
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- hazards that may occur when streaming mail and ways of controlling the risks involved
- how to open, face up and tray mail
- operating work systems, equipment, management and site operating systems, site layout and workplace procedures and policies for streaming mail
- performance standards and regulations relevant to mail operations
- problems that may occur when streaming mail and appropriate action that can be taken to

resolve or avoid these problems

- relevant WHS/OHS and environmental protection procedures and guidelines, including relevant personal protective equipment and procedures for its use.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
