Assessment Requirements for TLIA3026

Monitor storage facilities

Release: 1

Assessment Requirements for TLIA3026 Monitor storage facilities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- monitoring equipment performance
- operating and adapting to differences in equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures and signs
- using information on products and stock to determine, plan and organise processes used for monitoring storage facilities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes and regulations, permit and licence requirements relevant to workplace activities
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- operational work systems, equipment, management and site operating systems
- housekeeping standards and procedures
- information on various categories or groups of products including their key characteristics and hazards, and the special handling, stacking and storage requirements for each
- problems that may occur and appropriate action that can be taken
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- requirements for workplace documentation reports and records
- site layout

- types of storage areas and related equipment appropriate for different types of goods including perishable, fragile and/or hazardous/dangerous goods
- workplace procedures and policies relevant to the monitoring of storage facilities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
