Assessment Requirements for TLIB0014

Carry out a train roll-by inspection

Release: 1

Assessment Requirements for TLIB0014 Carry out a train roll-by inspection

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working collaboratively with others
- conducting roll-by inspection of a moving train to identify equipment, load security or other defects or failure
- documenting results of roll-by inspection including faults or defects requiring rectification in accordance with workplace operational procedures
- identifying job hazards and taking required actions to minimise, control or eliminate identified hazards
- identifying safe position from which to conduct roll-by inspection
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- reading and interpreting relevant instructions, workplace procedures, information and signs
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communications protocols
- contingency management processes
- rail danger zones
- relevant dangerous goods systems and dangerous goods regulation requirements
- relevant information/documents
- relevant legislated rail safety requirements, and codes of practice and/or guidelines
- relevant rail network standards, rules, codes of practice, guidelines and specifications for all items requiring examination
- relevant rail safety, WHS/OHS and environmental protection regulations

- relevant workplace procedures
- types of roll-by inspection of a moving train.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
