Assessment Requirements for TLIB0015 Clean transportation units and facilities for passenger use

Release: 1

Assessment Requirements for TLIB0015 Clean transportation units and facilities for passenger use

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate hazards that may exist when cleaning transportation units and facilities
- applying relevant legislation and workplace procedures in reference to cleaning transportation units and facilities for passenger use
- applying work health and safety (WHS)/occupational health and safety (OHS) requirements for cleaning transportation units and facilities
- communicating and working effectively with others when cleaning transportation units and facilities
- completing documentation related to work activities
- handling and storing hazardous substances and materials in accordance with safety data sheets (SDS)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities
- operating and adapting to differences in equipment in accordance with standard operating procedures (SOPs)
- reading, interpreting and following instructions, procedures, information and signs relevant to cleaning transportation units and facilities
- recording and reporting identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and safely using relevant equipment and materials when cleaning transportation units and facilities
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS/OHS standards
- selecting, mixing and applying appropriate cleaning materials
- working with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- communication requirements when cleaning transportation units and facilities
- documentation and record requirements
- equipment, chemicals and materials used when cleaning transportation units and facilities for passenger use, and the precautions and procedures to be followed in their use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for cleaning transportation units and facilities for passenger use
- problems that may occur when cleaning transportation units and facilities, and appropriate action that can be taken to resolve these problems
- regulations relevant to cleaning transportation units and facilities for passenger use including, where relevant, the Australian Dangerous Goods (ADG) Code and relevant health and hygiene requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- workplace and/or site layout
- workplace procedures and policies for cleaning transportation units and facilities for passenger use, including filling containers and disposing of water/wastewater

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.
