TLIB0015 Clean transportation units and facilities for passenger use

Release: 1

TLIB0015 Clean transportation units and facilities for passenger use

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to clean transportation units and facilities for passenger use.

It includes identifying and preparing for cleaning, cleaning the facility or unit, identifying minor maintenance requirements of transportation units and facilities, and completing all work requirements in accordance with workplace and codes/regulatory requirements as part of work activities within the transport and logistics industry.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify and prepare

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Transportation units and facilities are inspected for hygiene and cleanliness in accordance with workplace policies and

for cleaning	procedures
	1.2 Customer complaints regarding lack of hygiene and cleanliness within transport units and facilities are documented, investigated and resolved where relevant
	1.3 Transport units or areas requiring cleaning and the nature of the material to be cleaned is determined in accordance with manufacturer instructions and safety data sheets (SDS)
	1.4 Cleaning procedures are identified, and cleaning materials and equipment are organised in accordance with workplace procedures
	1.5 Areas that pose a safety risk are identified and cordoned off to prevent access by staff and customers until such time they are cleaned in accordance with workplace procedures
2 Clean facility or unit	2.1 Transportation units and facilities are cleaned or detailed to workplace standards
	2.2 Cleaning equipment is operated in accordance with manufacturer instructions and workplace procedures and, where relevant, WHS/OHS regulations and/or codes of practice
	2.3 Chemicals are used in accordance with SDS, WHS/OHS regulations, codes of practice, policies and workplace procedures
	2.4 Hazardous and general waste is removed in accordance with WHS/OHS regulations, codes of practice and workplace procedures
3 Identify minor maintenance requirements of transportation units and facilities	3.1 Transport units and facilities are inspected to identify maintenance requirements
	3.2 Minor maintenance of transport units and facilities is conducted in accordance with manufacturer instructions, workplace policies and procedures
	3.3 Maintenance requirements are documented and reported in accordance with workplace procedures
4 Complete work	4.1 Cordoned off area is re-opened for use when safe for staff and customer access
	4.2 Transportation units/facilities cleanliness and appearance are verified prior to being released for service

- 4.3** Cleaning equipment stocks are monitored and replenished, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB1024 Clean transportation units and facilities for passenger use.

Assessment Requirements for TLIB0015 Clean transportation units and facilities for passenger use

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate hazards that may exist when cleaning transportation units and facilities
- applying relevant legislation and workplace procedures in reference to cleaning transportation units and facilities for passenger use
- applying work health and safety (WHS)/occupational health and safety (OHS) requirements for cleaning transportation units and facilities
- communicating and working effectively with others when cleaning transportation units and facilities
- completing documentation related to work activities
- handling and storing hazardous substances and materials in accordance with safety data sheets (SDS)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities
- operating and adapting to differences in equipment in accordance with standard operating procedures (SOPs)
- reading, interpreting and following instructions, procedures, information and signs relevant to cleaning transportation units and facilities
- recording and reporting identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and safely using relevant equipment and materials when cleaning transportation units and facilities
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS/OHS standards
- selecting, mixing and applying appropriate cleaning materials
- working with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- communication requirements when cleaning transportation units and facilities
- documentation and record requirements
- equipment, chemicals and materials used when cleaning transportation units and facilities for passenger use, and the precautions and procedures to be followed in their use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for cleaning transportation units and facilities for passenger use
- problems that may occur when cleaning transportation units and facilities, and appropriate action that can be taken to resolve these problems
- regulations relevant to cleaning transportation units and facilities for passenger use including, where relevant, the Australian Dangerous Goods (ADG) Code and relevant health and hygiene requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- workplace and/or site layout
- workplace procedures and policies for cleaning transportation units and facilities for passenger use, including filling containers and disposing of water/wastewater

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.
