# **Assessment Requirements for TLIB0016 Clean up plant, equipment and worksite**

**Release: 1**

# Assessment Requirements for TLIB0016 Clean up plant, equipment and worksite

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and worksites in accordance with workplace procedures
- applying cleaning agents, sealants and chemicals
- applying precautions and required actions to minimise, control or eliminate hazards that may exist during work activities
- following contingency plans when cleaning up plant, equipment and worksites
- following documentation related to cleaning up plant, equipment and worksites
- following relevant legislation, work health and safety (WHS)/occupational health and safety (OHS) regulations, and workplace procedures
- identifying and reclaiming salvageable materials
- identifying and removing disposable materials
- identifying and reporting hazardous materials
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating relevant mobile plant and equipment
- reading, interpreting and following instructions, procedures, information and signs relevant to cleaning up plant, equipment and worksites
- reporting and/or rectifying identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- using barriers correctly
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- applicable legislated safety requirements, including state/territory Acts, regulations and nationally approved compliance codes and/or guidelines
- applications and characteristics of plant and equipment
- cleaning agents/sealants and their properties and precautions for their use
- cleaning equipment, related materials and their applications
- hazards that may exist when cleaning up plant, equipment and worksites and ways of controlling the risks involved
- manufacturer instructions for servicing and cleaning equipment
- potential problems when cleaning up plant, equipment and worksites, and solutions
- relevant recording and documentation requirements
- relevant workplace procedures for cleaning up plant, equipment and worksites.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.
