Assessment Requirements for TLIB0019 Inspect, prepare and start an electric tram

Release: 1

Assessment Requirements for TLIB0019 Inspect, prepare and start an electric tram

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in trams and associated equipment and procedures
- checking and replenishing sand on an electric tram, as required
- checking electric tram equipment in accordance with workplace procedures
- conducting pre-operational and in-cab checks in accordance with workplace operational procedures
- conducting a visual inspection of an electric tram and associated equipment in accordance with workplace procedures
- identifying and assessing tram defects and deficiencies and taking appropriate actions to report, isolate, repair or replace identified defective equipment in accordance with workplace procedures
- identifying job hazards and required actions to minimise, control or eliminate identified hazards
- interpreting and following instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate actions
- operating and checking electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, information, workplace procedures and signs
- selecting and using required personal protective equipment (PPE) conforming to work health and safety (WHS)/occupational health and safety (OHS) and industry standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- cleaning requirements for an electric tram
- communication equipment checks
- electric tram controls, instruments and indicators and their purpose, location and use
- external features of an electric tram that must be checked during a pre-operational visual inspection
- functions of:
 - all supervisory indicators and controls and related checks for correct operation
 - ancillary systems on an electric tram and related checks for correct operation
 - operating controls to start, accelerate, decelerate and stop an electric tram
 - sand as used on an electric tram and the procedures for checking and refilling sand levels and carrying out sand system testing processes on an electric tram
- monitoring devices, braking and power equipment, safety systems, ancillary systems and any signalling systems
- principles, purpose and location of controls, monitoring devices, braking, power source and traction systems
- rail safety, WHS/OHS, and environmental procedures and regulations
- relevant state/territory road traffic authority and tramway operating procedures
- requirements for completing relevant documentation when inspecting, preparing and starting an electric tram
- typical defects that can occur on an electric tram and related actions to be taken
- workplace procedures for:
 - adjusting controls to optimise the operation of an electric tram
 - braking and safety system procedures for an electric tram
 - emergency response procedures
 - identifying equipment defects and assessing for appropriate actions
 - managing and controlling hazardous situations when preparing and starting up an electric tram
 - minor maintenance including cleaning
 - on-tram pre-operational checks for an electric tram
 - operating electronic communications equipment in accordance with required protocol
 - raising and lowering a pantograph or trolley pole on an electric tram, as fitted
 - starting and operating ancillary systems on an electric tram
 - start-up procedures for an electric tram
 - visual inspection procedures for an electric tram.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate tram workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
