TLIB0127 Certify rolling stock prior to handover

Release: 1

TLIB0127 Certify rolling stock prior to handover

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to certify rolling stock as fit for purpose in accordance with relevant organisational procedures, rail industry standards, rules, regulations and codes of practice.

It includes completing certification and documentation in accordance with organisational or client requirements.

This unit applies to workers required to carry out these activities as part of a maintenance role within a defined location on behalf of their own or a client's organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Complete certification

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Certification requirements for particular rolling stock are confirmed by reference to applicable specifications

requirements

- 1.2 Planned activities are identified in accordance with organisational procedures
- 1.3 Hazards are identified, risks are assessed and control measures are implemented
- 1.4 Completed maintenance activities are verified against planned activities
- 1.5 Completed maintenance activities are validated as required in accordance with organisational procedures
- 1.6 Where maintenance activities are not completed an assessment is carried out to confirm rolling stock is fit for purpose in accordance with organisational procedures
- 1.7 Completed maintenance activities are confirmed against operational performance requirements
- 1.8 Certificate is issued in accordance with organisational procedures

2 Complete documentation

- 2.1 Required documentation procedures and processes are confirmed
- 2.2 Documentation is filled in legibly and proofread, in accordance with organisational procedures and regulatory requirements
- 2.3 Required documentation is archived in accordance with organisational procedures and regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB0127A Certify rolling stock prior to handover.

Assessment Requirements for TLIB0127 Certify rolling stock prior to handover

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- reading and interpreting relevant procedures and standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable specifications for the type of rolling stock being certified
- organisational requirements for certifying rolling stock
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and relevant regulations
- requirements for completing relevant documentation when certifying rolling stock prior to handover
- requirements of organisational maintenance systems, procedures, rail industry standards, codes of practice and schedules.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, rail industry standards, codes of practice and operation manuals.
