Assessment Requirements for TLIB1080 Use, clean and maintain towing equipment

Release: 1

Assessment Requirements for TLIB1080 Use, clean and maintain towing equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in towing vehicles, associated equipment and workplace procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- modifying activities depending on towing contexts, risk situations and environments
- planning own work, predicting consequences and identifying improvements
- reading and interpreting relevant instructions, procedures and labels
- recognising problems concerning the safety and operational capability of a towing vehicle and its equipment and taking appropriate action
- selecting and using relevant equipment, tools and cleaning agents
- using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards including the operation of portable fire extinguishers
- working safely and collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics, capabilities and limitations of towing vehicle and its equipment
- documentation and record requirements when using, cleaning and servicing a towing vehicle and its equipment
- focus of operation of work systems, equipment, management and workplace operating systems for using, cleaning and servicing a towing vehicle and its equipment
- hazards that may exist when using, cleaning and servicing a towing vehicle and its equipment, and the precautions and action that should be taken to minimise or eliminate hazards concerned
- housekeeping standards and procedures
- operational safety requirements for towing vehicle and equipment concerned
- problems that may occur and appropriate action that can be taken to resolve these problems
- relevant regulations and standards
- relevant WHS/OHS and environmental protection procedures and guidelines
- safe working loads for towing vehicle
- tools, materials and equipment for using, cleaning and maintenance of a towing vehicle and its equipment, and the precautions and procedures that should be followed in their use
- workplace procedures and policies for using, cleaning and servicing of a towing vehicle and its equipment.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, load restraint guide, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
