Assessment Requirements for TLIB1093 Clean equipment and restore worksite

Release: 2

Assessment Requirements for TLIB1093 Clean equipment and restore worksite

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor Performance Evidence changes
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying cleaning agents, sealants and chemicals in accordance with safety data sheets (SDS)/material safety data sheets (MSDS) and/or manufacturer instructions and workplace procedures
- completing relevant workplace documentation
- disposing of waste materials in accordance with workplace procedures
- identifying and obtaining correct materials and equipment
- identifying and reclaiming salvageable materials
- identifying and removing water/waste/surplus materials
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- leaving site in a suitable condition
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment and sites in accordance with operating procedures
- operating and maintaining relevant cleaning equipment in accordance with workplace procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly, in accordance with workplace procedures
- using quarantine zone and barriers in accordance with environmental and workplace procedures when disposing of material
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- cleaning agents/sealants and their properties and precautions for their use
- cleaning equipment and related materials, and their applications
- hazards that may exist when cleaning up plant, equipment and worksites, and ways of controlling the risks involved
- manufacturer instructions for cleaning equipment
- problems that may occur when cleaning up plant, equipment and worksites, and action that can be taken to report or resolve these problems
- relevant rail danger zones
- relevant recording and documentation requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and codes of practice
- SDS/MSDS, manufacturer instructions and organisational procedures
- workplace procedures for cleaning up plant, equipment and worksites.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, SDS/MSDS, codes of practice and operation manuals.
