Assessment Requirements for TLIB2034 Maintain poles and associated hardware

Release: 2

Assessment Requirements for TLIB2034 Maintain poles and associated hardware

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in tools and equipment in accordance with operating procedures
- applying relevant workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable state/territory legislated rail safety and safeworking requirements, relevant codes of practice and/or guidelines
- characteristics, capabilities, uses, limitations and location standards for different types of poles
- documentation and records systems related to pole management

- hazards that may exist when maintaining poles and associated hardware and ways of controlling the risks involved
- pole maintenance techniques and processes
- pole treatment chemicals and HAZCHEM requirements in accordance with safety data sheets (SDS)/material safety data sheets (MSDS) and/or manufacturer instructions and organisational procedures
- procedures for support plant and equipment
- relevant rail danger zones
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations including WHS/OHS instructions related to pole erection, site safety and rescue techniques
- responsibilities in relation to other authorities, clients and landowners
- workplace procedures for maintaining poles and associated hardware
- workplace technical manuals and instructions for maintaining poles and associated hardware.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, SDS/MSDS, regulations, codes of practice and operation manuals.
