Assessment Requirements for TLIB2079 Set up and secure a towing situation

Release: 2

Assessment Requirements for TLIB2079 Set up and secure a towing situation

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- modifying activities depending on workplace contexts, risk situations and towing situations
- planning and prioritising own work, predicting consequences and identifying improvements
- reading and interpreting relevant instructions, procedures and information
- recognising problems and taking appropriate action
- selecting and use personal protective equipment (PPE) in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements
- selecting and using relevant equipment and tools
- working safely and collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- documentation and record requirements when checking and assessing equipment operational capability
- hazards that may exist when setting up and securing a towing situation and precautions and actions that should be taken to minimise or eliminate identified hazards
- housekeeping standards and procedures
- operational of work systems, equipment, management and workplace operating systems for checking and assessing equipment operational capability
- operational safety requirements for equipment concerned
- problems that may occur when setting up and securing a towing situation and appropriate

actions that can be taken to resolve these problems

- regulations and standards relevant to setting up and securing a towing situation
- relevant WHS/OHS and environmental protection procedures and guidelines
- tools and equipment used when setting up and securing a towing situation and the precautions and procedures that should be followed in their use
- towing equipment characteristics, applications, capabilities and limitations
- workplace procedures and policies for checking and assessing equipment operational capability.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and PPE currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.
