# **Assessment Requirements for TLIB3006 Carry out inspection of vehicles designed to carry special loads**

**Release: 1**

# **Assessment Requirements for TLIB3006 Carry out inspection of vehicles designed to carry special loads**

## **Modification History**

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## **Performance Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- completing relevant documentation
- interpreting and following operational instructions and prioritise work
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information, technical data and drawings
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## **Knowledge Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- principles of operation of systems on commercial vehicles including:
  - electrical systems
  - fuel systems
  - cooling systems
  - steering systems
  - exhaust systems
  - tyres, brakes

- relevant ancillary systems
- problems that may occur during routine inspection of a vehicle and its associated ancillary equipment, and appropriate actions and solutions
- procedures for checking and routine inspection of a commercial vehicle designed to carry special loads, in accordance with workplace and manufacturer requirements and established safety rules and regulations including:
  - visual inspection
  - pre-operational checking
  - warning systems checking
- relevant duty of care requirements for routine inspection of vehicles designed to carry special loads
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- relevant recording and documentation procedures
- techniques for recognising faults and vehicle/ancillary system irregularities.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
