Assessment Requirements for TLIB3087

Examine timber structures

Release: 2

Assessment Requirements for TLIB3087 Examine timber structures

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Performance Evidence frequency changed
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant workplace procedures
- communicating effectively with others when conducting a detailed timber structures examination
- examining a range of timber structure types
- following operational instructions and work sequences when examining timber structures
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying, selecting and using measuring instruments and equipment
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- planning and organising remedial work
- reading and interpreting relevant plans and specifications
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- taking appropriate action for identified defects.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- hazards that may exist when conducting a detailed timber structures examination and ways of controlling the risks involved
- problems that may occur when conducting a detailed timber structures examination and action that can be taken to report or resolve these problems
- relevant rail danger zones
- relevant recording and documentation procedures
- relevant safety, work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- safety data sheets (SDS)/material safety data sheets (MSDS) and/or manufacturer instructions
- timber structures examination methods and fault detection techniques
- workplace procedures for conducting a detailed timber structures examination.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available; in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, SDS/MSDS, rail industry standards, codes of practice and operation manuals.
