TLIB3105 Prepare electric passenger train

Release: 1

TLIB3105 Prepare electric passenger train

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to check and assess the operational capabilities of equipment prior to an electric passenger train entering service.

It includes inspecting equipment and work area, checking the operational capability of equipment and its safety devices, identifying and assessing the impact of faults on safety and work requirements, and recording and reporting the results of inspection and testing in accordance with workplace procedures.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

Work is generally performed without supervision and within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Carry out preparation checks | <ul style="list-style-type: none">1.1 Location of train is determined in accordance with allocation procedures1.2 Organisational safety controls are identified and acted on1.3 Relevant work health and safety (WHS)/occupational health safety (OHS) requirements are followed to prevent injury and damage |
| 2 Inspect, start and test equipment | <ul style="list-style-type: none">2.1 Required checks, procedures and standards are identified prior to start up2.2 Prior to start up, relevant equipment is inspected in accordance with workplace pre-operational functional safety check procedures and operational instructions2.3 Train is started up in accordance with operational instructions2.4 Following start up, relevant equipment and components are tested in accordance with workplace procedures2.5 Aspects of equipment found to be outside operational specifications are reported for appropriate action2.6 Safety warning systems are checked for operational effectiveness2.7 Control systems are checked in accordance with workplace policies and procedures2.8 Train braking systems are applied and released to ensure they are operating correctly2.9 Faults are identified and appropriate corrective action is taken to ensure operational safety |
| 3 Carry out visual inspection and check condition of train | <ul style="list-style-type: none">3.1 Visual inspection is conducted in accordance with workplace procedures to identify any defects that would prevent safe transit3.2 Communication is maintained with relevant personnel to ensure safe, efficient and complete inspection3.3 Condition of train consist is visually inspected and faults are rectified and/or reported3.4 Conditions requiring urgent action are noted and appropriate action is taken to initiate immediate response |

- 3.5 Passenger facilities are checked to ensure they are clean
- 3.6 Passenger operated equipment is visually checked to ensure operational readiness
- 4 Record and report faults and/or defects**
 - 4.1 Faults and/or defects are accurately reported in accordance with organisational requirements
 - 4.2 Accurate records are kept in accordance with organisational requirements
 - 4.3 Potential defects that may affect future safety of equipment are reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB3105A Prepare electric passenger train.

Assessment Requirements for TLIB3105 Prepare electric passenger train

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- checking and testing train equipment in accordance with workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- implementing contingency plans
- inspecting electric passenger train exterior visually in accordance with workplace procedures
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information, labels and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment and communications technology when checking and assessing equipment operational capability
- selecting and using required personal protective equipment conforming to work health and safety (WHS)/occupational health and safety (OHS) and industry standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- equipment characteristics, capabilities and limitations
- housekeeping procedures
- operational safety requirements when preparing an electric passenger train for service
- problems that may occur when preparing an electric passenger train for service, and appropriate action that can be taken to resolve these problems
- relevant safety, WHS/OHS, and environmental procedures and regulations
- workplace procedures for checking and assessing equipment operational capability when preparing an electric passenger train for service.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
