Assessment Requirements for TLIC0008

Assist with shunting, coupling and uncoupling electric passenger trains

Release: 1

Assessment Requirements for TLIC0008 Assist with shunting, coupling and uncoupling electric passenger trains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and in two separate locations and include:

- applying relevant safeworking and workplace procedures
- carrying out pre-shunting checks in accordance with workplace procedures
- communicating effectively with others
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions defects promptly, in accordance with workplace procedures
- shunting trains in more than one location including sidings and depots/yards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communications protocols
- coupling systems, their components and their operation
- diagnostic techniques relating to shunting, coupling and uncoupling electric passenger trains
- emergency procedures
- relevant rail danger zones
- relevant sections of applicable state/territory legislated rail safety and safeworking

- requirements, codes of practice and/or guidelines
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations including codes of practice for manual handling
- shunting workplace procedures and requirements
- types of couplers and their purpose
- types of coupling adaptors and their purpose.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, safeworking system, codes of practice and operation manuals.
