TLIC0013 Drive and operate electric passenger train

Release: 1

TLIC0013 Drive and operate electric passenger train

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive and operate an electric passenger train to operational requirements in accordance with system of safeworking, regulatory requirements and workplace procedures.

It includes applying train management techniques to manage the movement of a train, conducting all movements and related activities required to meet operational requirements, changing ends, and handing over a train to a relief crew.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

Work is generally performed without supervision and within a team environment. It involves the application of routine operational principles and procedures when driving electric passenger trains to operational requirements as part of workplace activities across a variety of operational contexts within the Australian rail systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation.

Unit Sector

Rail sector.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Drive electric passenger train efficiently and effectively

- 1.1** Train is operated in accordance with relevant codes of practice, workplace procedures and instructions
- 1.2** Train is operated safely in accordance with track/road characteristics and route conditions
- 1.3** Hazards are identified, risks assessed and risk control measures implemented
- 1.4** Electric passenger train operations are controlled to minimise wear, maximise efficiency and avoid damage
- 1.5** Electric passenger train is operated with due care for passenger comfort and quality of ride
- 1.6** Train is safely operated to specified timetable and schedule in accordance with on-time running standards
- 1.7** Performance of equipment and rolling stock is monitored to maintain optimum running conditions and to identify faults, defects and efficiencies
- 1.8** Relevant codes of practice, work health and safety (WHS)/occupational health safety (OHS) and environmental requirements are followed to prevent injury and damage

2 Operate electric passenger train in accordance with operating procedures

- 2.1** Electric passenger train documentation is received, interpreted and followed
- 2.2** Relevant codes of practice, system of safeworking and signalling system and requirements are adhered to throughout train operations
- 2.3** Network control officer instructions and other instructions are received, interpreted and applied to ensure safe and effective control of train
- 2.4** Communications are maintained with relevant personnel during train journey in accordance with relevant codes of practice and system of safeworking
- 2.5** Instructions about train operation are given to relevant personnel to ensure safe and efficient running

3 Manage communications

- 3.1** Passengers are advised of station identification, emergency situations and other critical information, as required, using train communications system

- 3.2 Network control officer and other instructions are received, interpreted and applied to ensure safe and effective control of train
- 3.3 Communications are maintained with network control officer and other relevant personnel during train journey in accordance with workplace procedures, relevant codes of practice and system of safeworking
- 3.4 Instructions about train operation are given to relevant personnel to ensure safe and efficient on-time running
- 3.5 Instructions are verified as required, interpreted and followed in accordance with relevant codes of practice, system of safeworking and workplace policies and procedures to ensure actions taken are appropriate and safe
- 3.6 Fixed, hand and/or board signals, control systems, trackside signs and verbal movement commands are interpreted and followed in accordance with relevant codes of practice, system of safeworking and workplace policies and procedures to ensure actions taken are appropriate and safe

4 Change ends

- 4.1 Arrival procedures are carried out in accordance with workplace policies and procedures
- 4.2 Checks and terminus inspections are carried out in accordance with workplace policies and procedures
- 4.3 Departure procedures are carried out in accordance with workplace policies and procedures

5 Carry out in-service inspections

- 5.1 Train checks are made in accordance with workplace procedures
- 5.2 Problems and defects are identified and reported/rectified in accordance with workplace procedures, other regulatory requirements and manufacturer instructions
- 5.3 Incidents or unusual occurrences are reported to relevant personnel in accordance with established policies and procedures

6 Handover electric passenger train to relieving driver

- 6.1 Identity of relieving driver is checked and confirmed, as required
- 6.2 Relieving driver is advised of condition and location of train, as required

- 6.3** Relieving driver is updated and is made aware of relevant documentation, as required
- 7 Accept electric passenger train handover as relief driver**
- 7.1** Relieving driver position is taken up at correct time and location in accordance with workplace requirements
- 7.2** Identification is presented to train driver being relieved, as required
- 7.3** Relevant documentation is identified and referred to in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3046 Drive and operate electric passenger train.

Assessment Requirements for TLIC0013 Drive and operate electric passenger train

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in electric passenger trains, associated trains and ancillary equipment
- carrying out electric passenger train handover in accordance with workplace procedures
- communicating effectively and working collaboratively with others as part of a train crew
- completing relevant documentation
- driving electric passenger train efficiently and effectively with due consideration to track and conditions
- identifying job hazards and taking required actions to minimise, control or eliminate identified hazards
- interpreting and following operational instructions and prioritising work
- maintaining on-time running
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring train performance to facilitate optimum safe operation
- operating electronic communications equipment to required protocol
- reading and interpreting relevant instructions, workplace procedures, information and signs
- recognising problems that may arise and taking appropriate actions
- securing electric passenger train
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to vehicles or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable state/territory legislated rail safety requirements, relevant codes of practice and/or guidelines

- electric passenger train characteristics
- procedures and required protocol for operating electronic communications equipment
- procedures for carrying out in-service checks
- relevant WHS/OHS and environmental procedures and regulations
- requirements for completing relevant documentation
- signalling system for rail network
- system of safeworking
- track and road characteristics including track limitations, speed limitations, gauge limitation, curves and gradients, location of signals and crossings, crossovers, and yard and siding layouts
- train equipment and systems including instruments and indicators and their purpose, location and use
- workplace operating procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Practical assessment must occur in an appropriate range of situations in the workplace.

A simulator assessment is not suitable for the final assessment of this unit of competency

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
