Assessment Requirements for TLIC0016

Identify and respond to signals and trackside signs

Release: 1

Assessment Requirements for TLIC0016 Identify and respond to signals and trackside signs

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- communicating effectively with others
- completing required documentation
- identifying job hazards and taking required actions to minimise, control or eliminate identified hazards
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, workplace procedures and information including numerical information
- responding to different indications and aspects displayed by signalling systems within the rail networks
- responding to different trackside signs within rail networks
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- relevant rail safety, work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations including emergency response workplace procedures
- relevant sections of applicable state/territory legislated rail safety requirements, relevant system of safeworking, codes of practice and/or guidelines
- signalling system for rail network including fixed signals, Automatic Train Protection/Control (ATP/C) and Positive Train Control (PTC) systems as appropriate
- types of fixed or electronically displayed signals used within the rail network
- types of trackside signs used within the rail network

- use of communications and other signalling/operational control equipment and/or systems
- workplace procedure for responding to illegal or irregular indications displayed by running signals or shunting signals.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, system of safeworking, regulations, codes of practice and operation manuals.
