Assessment Requirements for TLIC0084 Access rail track to travel track vehicles under manual block working conditions

Release: 1

Assessment Requirements for TLIC0084 Access rail track to travel track vehicles under manual block working conditions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating effectively with Network Control Officer, individuals and work groups
- explaining appropriate response to unsafe situations and/or emergencies
- following workplace policies, safeworking procedures and protocols
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying unsafe situations and emergencies
- planning travel movements and identifying limits of travel
- travelling track vehicle on track to worksite
- using appropriate personal protective equipment (PPE) that conforms to Rail Infrastructure Manager requirements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational communications protocols and systems
- Rail Infrastructure Manager safeworking system and organisational requirements, rules, policies, workplace procedures and protocols
- Rail Infrastructure Manager policies, procedures and protocols for identified unsafe situations or emergencies relevant to accessing rail track to travel track vehicles under manual block working conditions
- rail terminology as defined by the Rail Infrastructure Manager safeworking system
- recognition of points, signals and location features
- relevant rail danger zones.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager safeworking system including workplace procedures, regulations, rules and codes of practice.
