Assessment Requirements for TLIC2054 Access rail track to run track vehicle within defined worksite

Release: 1

Assessment Requirements for TLIC2054 Access rail track to run track vehicle within defined worksite

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating effectively with individuals and work groups
- explaining appropriate response to identified unsafe situations and/or emergencies
- explaining how to safely access defined worksite
- explaining how to safely exit defined worksite
- following workplace procedures and protocols
- identifying changed conditions
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- observing speed limit appropriate for type of vehicle, type of track and local conditions
- operating under track protection rules
- using required personal protective equipment (PPE) that conforms to Rail Infrastructure Manager requirements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational communications protocols and systems
- points and signals recognition
- Rail Infrastructure Manager and organisational rules, policies, procedures and protocols
- Rail Infrastructure Manager policies, procedures and protocols for identified unsafe situations or emergencies within workplace role
- rail terminology as defined by relevant Rail Infrastructure Manager safeworking system
- safeworking systems and track protection.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager safeworking system including workplace procedures, regulations, rules and codes of practice.
