# **Assessment Requirements for TLIC4068 Operate heavy recovery ancillary equipment**

**Release: 1**

# **Assessment Requirements for TLIC4068 Operate heavy recovery ancillary equipment**

## **Modification History**

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## **Performance Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two occasions and include:

- completing relevant documentation
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- operating heavy recovery ancillary equipment
- reading and interpreting relevant instructions, procedures, information and signs.

## **Knowledge Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- factors that may cause traffic delays and diversions
- manufacturer specifications and operator manuals
- relevant dangerous goods information for operating ancillary equipment
- relevant state/territory roads and traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- workplace documentation
- workplace driving and operational instructions.

## **Assessment Conditions**

As a minimum, assessors must satisfy applicable regulatory requirements, which include

requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Candidates are required to:

- identify three (3) different types of ancillary recovery equipment and their uses and
- operate two (2) types of heavy recovery ancillary equipment safely.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
