Assessment Requirements for TLID0019 Shift loads using manually-operated equipment

Release: 1

Assessment Requirements for TLID0019 Shift loads using manually-operated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with workplace procedures
- applying precautions and required actions to minimise, control or eliminate hazards that may exist when shifting loads using manually-operated equipment
- communicating and working effectively with others when using manually-operated equipment to shift loads
- completing documentation related to work activities
- identifying load limits for lifting
- identifying manually-operated equipment and their capabilities
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- reading and interpreting instructions, procedures, information and signs relevant to shifting loads using manually-operated equipment
- relocating loads safely in accordance with workplace policies and procedures
- reporting and/or rectifying identified problems in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- effects of moving contents, which may be loose, liquid, dangerous or hazardous
- housekeeping standards and procedures
- problems when using manually-operated equipment to shift loads, and solutions
- relevant WHS/OHS procedures and guidelines concerning the use of manually-operated equipment to shift loads
- risks when using manually-operated equipment to shift loads, and related precautions to control these risks
- safe working load (SWL)
- site layout and obstacles
- workplace procedures and policies for shifting goods and materials using manually-operated equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.
