Assessment Requirements for TLID1002 Shift a load using manually-operated equipment

Release: 1

Assessment Requirements for TLID1002 Shift a load using manually-operated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist when shifting loads using manually-operated equipment
- communicating and working effectively with others when using manually-operated equipment to shift loads
- completing documentation related to work activities
- identifying load limits for lifting
- identifying manual operating equipment and their capabilities
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading and interpreting instructions, procedures, information and signs relevant to shifting loads using manually-operated equipment
- relocating a load safely
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- method for splicing and maintaining cordage and SWL
- problems that may arise when using manually-operated equipment to shift loads, and actions that should be taken to prevent or solve these problems
- relevant knots and lashings
- relevant WHS/OHS procedures and guidelines concerning the use of manually-operated equipment to shift loads
- relevant slings and securing devices
- risks when using manually-operated equipment to shift loads, and related precautions to control these risks
- site layout and obstacles
- workplace procedures and policies for shifting goods and materials using manually-operated equipment.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
