TLIE3002 Estimate/calculate mass, area and quantify dimensions

Release: 1

TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to estimate and calculate mass, area and quantify dimensions of loads in accordance with workplace requirements and relevant regulations, as part of work functions within the transport and logistics industry.

It includes estimating loads to be transported or placed in storage, estimating load limits of transport and/or storage systems, and organising a load.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

1 Estimate loads for transport or storage

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Order forms/work orders are read and requirements are noted

1.2 Shape, balance characteristics, dimensions and mass of load/s are identified

- 1.3 Area/volume required for storage is estimated
- 1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system
- 2 Estimate load limits of transport and/or storage**
 - 2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures
 - 2.2 Capacity of transport and storage systems in terms of mass, area and volume is calculated
- 3 Organise load**
 - 3.1 Load/s is restricted to allowable range
 - 3.2 Load/s is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
 - 3.3 Appropriate workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3002A Estimate/calculate mass, area and quantify dimensions.

Links

Companion Volume implementation guides are found in VETNet -
