Assessment Requirements for TLIF0004 Work effectively in a train-driving environment

Release: 2

Assessment Requirements for TLIF0004 Work effectively in a train-driving environment

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Performance Evidence
- Minor statement changes in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- allocating attention according to priorities
- assessing and reassessing situations continually
- being vigilant and keeping attention
- communicating effectively with rail operations staff
- developing and implementing safety and operations plans
- executing response training in critical situations
- familiarising oneself with locomotive and train system being used
- identifying job hazards and taking required actions to minimise, control or eliminate identified hazards
- keeping industry knowledge up to date
- performing to track owner requirements, specifications and operational demands
- prioritising safety issues that will impact on work tasks
- remaining alert and active when monitoring train operations
- reporting changes in situations as necessary
- scanning environment at regular intervals or important points in the process.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- decision making processes
- emergency management plan and workplace procedures

- factors that impact on worker health and wellbeing and their effects
- fatigue management strategies
- how preconceptions of what is going to happen can detract from situational awareness
- how to interpret and prepare for rosters
- how to make better use of resources (human, equipment, information and procedures) to reduce rail safety occurrences
- how to reduce rail safety occurrences attributable to human error
- human error as a source of risk in rail operations
- impact illness and medication can have on information processing
- notices and directives about new and altered policies, processes and procedures
- operating procedures to avoid identified threats and errors occurring
- relevant safety, work health and safety (WHS)/occupational health and safety (OHS), and environmental procedures and regulations
- risk management processes (hazard identification, risk management and risk controls)
- roles of other rail operations staff as they impact on train driving
- self-management
- situations that can result in a loss in situational awareness
- teamwork
- threat and error management
- tools and techniques to improve and manage human factors.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Practical assessment must occur in an appropriate range of situations in the rail workplace.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
