TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Release: 2

TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Added job roles titles to unit Application
- Minor grammatical changes to Performance Criteria
- Minor changes in Performance Evidence to clarify terminology
- Minor changes in Knowledge Evidence to clarify terminology.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to ensure the safety of transport activities.

It includes identifying features and applying chain of responsibility obligation in the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations. It also includes identifying and reporting chain of responsibility risks.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this unit of competency, include but are not limited to:

- administration worker
- equipment worker
- freight handler
- intermodal terminal worker
- loader and/or unloader of a heavy vehicle
- loading manager for any goods in a heavy vehicle
- logistics worker
- mobile crane worker
- picker and packer worker
- receipt and despatch worker
- scheduler
- specialised cargo handler
- stevedore
- storeperson
- supply chain worker
- warehouse worker

Transport activities as defined by the HVNL or applicable state/territory law and regulations.

Work is performed under close direction, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify chain of responsibility features in the HVNL or applicable state/territory law and regulations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Transport activities and parties in the chain of responsibility are identified
- 1.2** Principle of shared responsibility obligations within chain of responsibility in the HVNL or applicable state/territory law and regulations are identified
- 1.3** Primary duty of each party in the chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
- 1.4** So far as is reasonably practicable or reasonable steps, compliance with chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
- 1.5** Breaches and penalties for failure to comply with chain of responsibility as identified in the HVNL or applicable

		state/territory law and regulations are explained
2	Apply chain of responsibility obligations in the HVNL or applicable state/territory law and regulations	2.1 Workplace policies, procedures and/or other documents relevant to transport activities as they apply to own job function are identified and explained
		2.2 Methods and requirements to facilitate and ensure management of speed and fatigue are explained in accordance with job functions and workplace procedures
		2.3 Methods to assess vehicle dimension and mass limits are explained in accordance with job functions and workplace procedures
		2.4 Methods to ensure loads are secured are explained in accordance with job functions and workplace procedures
		2.5 Heavy vehicles safety standards are identified in accordance with job functions and workplace procedures
		2.6 Transport activities hazards and risks are identified and assessed with control measures implemented and reported in accordance with job functions and workplace procedures
		2.7 Workplace procedures and industry practices for reporting transport activities risks are identified and followed
		2.8 Workplace documents relating to chain of responsibility are completed and processed to workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIF0001 Apply chain of responsibility legislation,

regulations and workplace procedures.

Assessment Requirements for TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Added job roles titles to unit Application
- Minor grammatical changes to Performance Criteria
- Minor changes in Performance Evidence to clarify terminology
- Minor changes in Knowledge Evidence to clarify terminology.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- applying workplace policies and procedures
- assessing the likelihood and consequences of harm relating to own job function on a minimum of three occasions
- completing safety documentation of identified transport activities of a heavy vehicle risk on a minimum of three occasions, each about a different type of risk
- ensuring safety of transport activities on road
- identifying risks associated with transport activities of own job function and at least two other job functions that could impact heavy vehicle safety on the road (directly or indirectly)
- implementing relevant risk control measures relevant to the job function in accordance with workplace procedures on a minimum of three scenarios
- reporting and recording observations and actions taken to address risks to the relevant person in accordance with workplace procedures on a minimum of three occasions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- actions required when possible risks of the transport activities are identified
- consideration of external factors in managing speed and fatigue
- function of driver and how they relate to transport activities, including level of influence and control
- heavy vehicle work and rest requirements
- impact of crossing legislative jurisdictions

- methods, industry standards and requirements to ensure safety of transport activities including relation to how they relate to transport activities including:
 - speed
 - fatigue
 - mass requirements
 - dimension requirements
 - loading requirements and load restraint
 - vehicle standards
- parties in the chain of responsibility and the concept of level of influence and control
- potential consequences of non-compliance with the applicable heavy vehicle state/territory law and regulations
- primary duty and executive duty obligations
- principle of shared responsibility
- risks and associated performance of the job functions in relation to safety of a heavy vehicle on a road
- transport activities as defined by the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations
- what constitutes an unreasonable request
- where to locate current information relating to heavy vehicle transport activities including:
 - codes of practices
 - fatigue-regulated heavy vehicle and definitions
 - heavy vehicle standards
 - securing loads, load placement and load restraint
 - vehicle dimension and mass limits
- workplace policies and procedures for own job function.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE)

currently used in industry

- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
