Assessment Requirements for TLIF0048 Manage rail safety compliance

Release: 1

Assessment Requirements for TLIF0048 Manage rail safety compliance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in relevant legislation and regulations
- applying relevant legislation and workplace procedures
- auditing a rail safety compliance system
- communicating effectively and working collaboratively with employees and management to implement an organisation's safety compliance system
- identifying or establishing rail safety compliance within an organisation
- monitoring activities and taking appropriate actions to manage different contexts, risk situations and environments
- organising audits and reviews of an organisation's safety compliance system
- reading and interpreting relevant documentation, and applying acquired information/knowledge to management activities
- recognising non-conformance within rail safety requirements and taking appropriate actions to rectify in accordance with workplace policies and procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- auditing principles and practice
- components of a rail safety compliance system
- legislation, regulations, permit and licence requirements relating to rail safety compliance, including elements contained in Schedule 1 of the Rail Safety National Law and national regulations
- options and resources for providing training and learning opportunities for employees about rail safety compliance
- procedures and audit tools for:
 - monitoring and reviewing organisation's rail safety compliance system and related policy and workplace procedures
 - reporting audit outcomes

- responsibilities of organisation and employees for implementing a rail safety compliance system
- responsibility assignment matrix or chart
- workplace systems for risk management and risk mitigation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
