Assessment Requirements for TLIF0098 Apply personal and equipment lockouts for rolling stock

Release: 1

Assessment Requirements for TLIF0098 Apply personal and equipment lockouts for rolling stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant rail safety legislation and workplace procedures
- communicating effectively with individuals and work groups
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying and following workplace procedures for locking out rolling stock
- identifying unsafe situations and emergencies
- removing rolling stock lockouts in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- organisational safety management system policies, lockout/tag out procedures and/or isolation protocols
- Rail Infrastructure Manager policies, procedures and protocols for identified unsafe situations or emergencies
- relevant rail danger zones
- relevant workplace procedures for applying personal and equipment lockout systems for rolling stock.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of

assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

- Practical assessment must occur in an appropriate range of situations in the rail workplace.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager safeworking system including workplace procedures, regulations, rules and codes of practice.
