Assessment Requirements for TLIF1009 Conduct cleaning operations in enclosed spaces

Release: 1

Assessment Requirements for TLIF1009 Conduct cleaning operations in enclosed spaces

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist when conducting cleaning procedures in enclosed spaces
- communicating and working effectively with others when conducting cleaning procedures in enclosed spaces
- completing documentation related to conducting cleaning procedures in enclosed spaces
- following routine servicing procedures for cleaning tools and equipment
- identifying and correctly using equipment, emergency equipment and cleaning materials
- implementing contingency plans when conducting cleaning procedures in enclosed spaces
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading, interpreting and applying relevant legislation, processes and workplace procedures for carrying out cleaning operations in enclosed spaces
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- Critical parameters for cleaning operations in enclosed spaces include:
 - emergency precautions, tests and procedures
 - evacuation and rescue procedures
 - precautions for self, others and work area
 - relevant workplace procedures to be followed
 - sequence of operations
 - workplace personnel
- maintenance procedures for cleaning equipment
- procedures for carrying out tests for contaminant gases in enclosed spaces prior to performing cleaning operations
- relevant industrial regulations and requirements
- relevant WHS/OHS regulations, codes and guidelines concerning cleaning operations in enclosed spaces
- risks when carrying out cleaning operations in enclosed spaces and related precautions to control these risks
- site layout and obstacles
- workplace procedures and policies for carrying out cleaning operations in enclosed spaces.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operations manuals.
