Assessment Requirements for TLIF2081 Perform lookout duties

Release: 1

Assessment Requirements for TLIF2081 Perform lookout duties

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating effectively with individuals and work groups
- complying with worksite protection plan
- complying with relevant workplace safeworking system rules and procedures
- identifying job hazards including unsafe and ineffective lookout positions and taking required action to minimise, control or eliminate identified hazards
- providing sufficient warning time for workers and equipment to move to a safe place
- taking up lookout position that enables effective communication of rail traffic movements
- using hand signals (with or without a flag or light) to communicate with rail traffic crew in accordance with workplace instructions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- audible warning equipment and its use
- emergency management plan and workplace procedures
- rail terminology as defined by the applicable Rail Infrastructure Manager
- relevant rail danger zones and safeworking systems
- relevant Rail Infrastructure Manager policies, procedures, rules and protocols for identifying unsafe situations or emergencies
- relevant Rail Infrastructure Manager rules, procedures and protocols.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of

assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant protection plan exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager safeworking system including workplace procedures, regulations, rules and codes of practice.
