Assessment Requirements for TLIF3015 Work safely as a non-electrical licensed worker near electrical assets

Release: 1

Assessment Requirements for TLIF3015 Work safely as a non-electrical licensed worker near electrical assets

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant WHS/OHS requirements and work practices
- communicating effectively with others
- developing effective planning, risk mitigation and problem-solving documents
- ensuring currency of relevant legislative and regulatory knowledge
- ensuring language used suits target audience
- giving and receiving feedback
- listening
- maintaining situational awareness
- making recommendations for further risk mitigation
- planning and managing time effectively
- planning for and managing contingencies
- planning own work, predicting consequences and identifying improvements
- questioning
- sequencing activities in a way that facilitates the development of competence
- transferring and apply skills and knowledge to new contexts.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- correct use of equipment, processes and procedures appropriate for work tasks
- emergency procedures
- hazard identification process
- identification of electrical asset types
- job/role and related environment skills
- relevant company policies and procedures

- relevant legislation, regulations, codes of practice, standards, policies and procedures
- relevant workplace tasks, skills and knowledge including knowledge of safe approach distances (clearance zones, no go zones and exclusion zones) and reasons for being declared as such
- risk assessment processes and controls relevant to worksite
- safe work methodologies and strategies
- safe work practices in relation to local areas of work
- WHS/OHS requirements and work practices.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
