TLIF4090 Implement safeworking rules and regulations for network control activities

Release: 1

TLIF4090 Implement safeworking rules and regulations for network control activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and coordinate systems of safeworking rules and regulations for network control activities.

It includes implementing safeworking rules and regulations; applying and managing safeworking protocols and communications; and taking appropriate action in safety incidents, unsafe situations or emergencies.

Work is performed using established operational procedures, with accountability and responsibility for self and others in achieving the prescribed outcomes with terminology as defined by the applicable Rail Infrastructure Manager safeworking system .

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

It covers the activities required by network control officers in the operation of safeworking procedures within their area of control.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Conduct network control activities following safeworking rules and procedures

- 1.1 Relevant rules for the applicable safeworking system are followed when carrying out network control activities as part of rail operation
- 1.2 Hazards are identified, risks are assessed and control measures are implemented
- 1.3 All network control activities are conducted in compliance with relevant state/territory safeworking rules and regulations
- 1.4 Requirements of the safeworking systems are implemented and managed in accordance with applicable safeworking system rules and regulations

2 Apply and manage communications

- 2.1 Communication protocols are applied and managed in accordance with applicable safeworking system requirements
- 2.2 Authorities required by safeworking systems are issued in accordance with applicable safeworking system rules and regulations using communication systems
- 2.3 Appropriate records of communications are managed as required within the applicable safeworking system rules, regulations and procedures

3 Apply safeworking protocols

- 3.1 Relevant protocols are managed as specified in the applicable safeworking system rules and regulations
- 3.2 Appropriate records and documentation pertinent to safeworking protocols are completed and managed in accordance with the requirements of the applicable safeworking system rules and regulations

4 Take action in unsafe situations or emergencies

- 4.1 Unsafe situations are identified in accordance with the requirements of applicable safeworking system rules and regulations
- 4.2 Where a safety incident, emergency or unsafe situation has been identified, appropriate action is taken to report and/or control the incident or situation in accordance with the requirements of applicable safeworking system

rules and regulations

- 4.3 Appropriate records and documentation of an identified unsafe situation, emergency or safety incident are maintained in accordance with the requirements of applicable safeworking system rules and regulations and organisational procedures
- 4.4 Reports of the identified unsafe situation, emergency or safety incident are completed in accordance with organisational requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF4090A Implement safeworking rules and regulations for network control activities.
