Assessment Requirements for TLIF4100

Identify and meet rail safety regulatory compliance requirements

Release: 2

Assessment Requirements for TLIF4100 Identify and meet rail safety regulatory compliance requirements

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Performance Evidence
- Minor statement changes in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and using relevant rail safety network standards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying, networking and establishing relationships with a diverse range of rail industry stakeholders
- identifying regulatory requirements
- interpreting complex information relating to rail safety regulation and communicating this to team members
- researching information relevant to the rail industry including rail safety regulations
- reviewing and communicating regulatory information changes.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- changes in rail industry operations and technology and the implications for rail safety regulation
- duty holders and their duties under Rail Safety National Law (RSNL) and related legislation
- key concepts and definitions relating to RSNL regulation
- key principles and practices associated with railway operations
- key regulatory and standards participants in the rail industry
- organisational systems for risk management and risk mitigation
- rail network and rail industry terminology, including terminology used in technical standards

- rail regulatory framework
- rail safety management systems
- relevance of national and international standards to the rail industry
- role of Rail Industry Safety and Standards Board (RISSB).

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, rail safety national law regulations, codes of practice and operation manuals.
